Dear Sir,

It is our great pleasure to inform you that JNTUH College of Engineering has been ranked 3 in Telangana category by **EDU RAND Rankings 2016**. JNTUH College of Engineering has outperformed the competition and we commend you on your performance.

EDU RAND Rankings, a collaboration between EDU, one of India's leading voices in the education sector and RAND Corporation USA a world renowned think tank, aim to provide reliable and impartial information to students facilitating informed decisions on their part. Exclusively dedicated to engineering colleges the Rankings have come to be recognized for their credibility and comprehensiveness. Added to that is our reach to the farthest corners of the country and our access to students who are normally beyond the focus of most media campaigns.

The EDU RAND Rankings 2015 rated over 800 colleges from all over the country. The rankings take into account factors such as the faculty qualifications at a college, the industry readiness of its students, the research productivity of the institution and the demand for seats at the college. With a thorough analysis of the aforementioned variables an attempt is made to come to a scrutinized result. The fruit of the exercise being the accumulation of an understanding of an institution's prowess across departments and in general. The Rankings then also serve as an indicator of the expectations from an institution and presents a credible track record of its achievements over the years.

We would like to congratulate you on this achievement and express our fervent hope that JNTUH College of Engineering will continue the great work that it has been doing.

EDU RAND ranks JNTUH College of Engineering as the number 3 ranked institution in Telangana category.
