ABOUT THE UNIVERSITY

Jawaharlal Technological University Hyderabad (JNTUH), a premier institute of technical education in India is providing quality education and promoting research for nearly 4 decades. The institute's environment of academic excellence led to the grant of Grade 'A' by NAAC (National Assessment and Accreditation Council).

ABOUT THE COLLEGE

JNTUH College of Engineering Hyderabad (JNTUH CEH) is a constituent college of JNTUH located at Kukatpally, Hyderabad 20 Kms from the heart of the city on Bombay National Highway (NH-9). The college has 12 departments offering various undergraduate and post graduate programmes. Besides academic programmes, the college is involved in extensive research activities and industrial consultancy services striving for excellence in all respects.

ABOUT THE DEPARTMENT

The Department of Computer Science and Engineering was initially a part of Electronics and Communication Engineering Department. In 1984 the Department started functioning as an independent Department. The Department has qualified staff and well equipped laboratories, and offers both undergraduate and post graduate programmes. Besides regular undergraduate and post graduate programmes, the department offers integrated and integrated dual degree programmes in collaboration with Blekinge Institute of Technology, Sweden and Asian Institute of Technology, Bangkok.

The department strives hard to nurture the young students into qualified and competent engineers prepared to accept the new challenges in the Industry.

Furthermore, the faculty is actively involved in research activities in various thrust areas such as high performance computing, wireless and mobile computing, data mining, information security, speech and natural language processing, image processing etc.

ABOUT THE WORKSHOP

Cloud computing is emerging as a prominent technology in the coming years with rapid and continuous growth of major global cloud data centers. Within the next decade, half of all information technology is estimated to be in the cloud. Therefore, the workshop on "Emerging Trends in Cloud computing" will make the participants adept at various cloud architectures and will help the participants keep up with all technologies, tools and methodologies required to understand and work on cloud computing principles used in the IT industry.

TOPICS TO BE COVERED

1. Technologies for creating Cloud Computing Environment on a Network of Computers
2. Tools for building Cloud applications
3. Guidelines for introducing cloud computing courses and initiating innovative R&D projects

HIGHLIGHTS OF THE WORKSHOP

- Exposure to Cloud
- Interactive lecture sessions
- Research challenges in Cloud Programming models
- Career guidance by experienced faculty.
